

Axpo Systems launches next-generation SCIONabled Security Operations Center (SOC)

Axpo Systems enhances its SOC with SCIONabled services to secure mission-critical infrastructures.

About Axpo Systems

Employees: 150
Footprint: 5 locations
Industry: OT solutions provider
SCIONabled since 2021
Product: EDGE, GATE, CONSOLE

Overview

Axpo Systems is a leading operational technology (OT) solutions provider, delivering mission-critical services to over 100 clients, including Axpo Group. Its portfolio includes specialized SOC services. In response to the growing cybersecurity challenges, Axpo Systems recognized the need to enhance its SOC services to protect critical infrastructures more effectively and efficiently.

The challenges

Axpo Systems' clients in mission-critical sectors face several key challenges:

- Increased vulnerability to cyber threats
- Insufficient external support or insufficiently equipped providers
- Operational disruptions and safety risks from cyberattacks
- Need for robust security measures and continuous monitoring
- Compliance with complex cybersecurity regulations

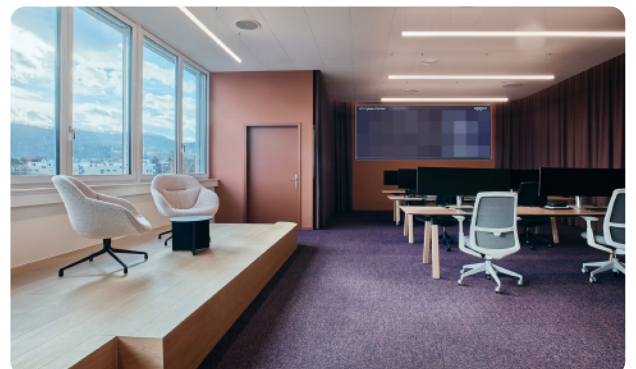

“We launched our new SOC to ensure mission-critical infrastructures in Switzerland operate securely and reliably. With this next-generation SCIONabled SOC, we are better positioned than ever to protect critical infrastructure for years to come.”

Manuel Dietrich
CTO of Axpo Systems

The solution

To address these challenges, Axpo Systems has integrated SCIONabled services into its SOC, focused on securing mission-critical infrastructures.

The implementation

Axpo Systems' SCIONabled SOC connects to its customers using Anapaya EDGEs and GATEs, offering services such as:

24/7 security monitoring, reporting, and dashboards

Incident response and threat management

Vulnerability and escalation management

Data analytics, backup-restore, and processing

Onsite troubleshooting and interventions

The outcome

The new SCIONabled SOC by Axpo Systems provides the following benefits for Axpo Systems and its customers:

Peace of mind

SCION reduces the attack surface by up to 99%, minimizing cyberattacks and mitigation efforts, while providing business leaders with confidence.

Cost efficiency

Fewer cyberattacks and scans lead to optimized resource allocation for SOC operators and reduced costs for customers.

Compliance

SCIONabled businesses adhere to strict cybersecurity regulations in critical sectors avoiding financial and reputational repercussions.

New revenue streams

Serving SCIONabled customers opens new business opportunities.

Competitive advantage

Axpo Systems is the only provider of SCION-integrated SOC services in the market.
